MY LIFE PHILOSOPHY

"I'm aware of who I am and desire to pursue my happiness in everything."

LANGUAGES

Bangla ●●●●●

English ●●●●○

ACHIEVEMENTS

College Achievement
Got first prize from our honorable director sir for my outstanding academic performance.

University Achievement
Got dean's award from our respected VC sir

EDUCATION

B.Sc. in Dept. of ECE

Khulna University of Engineering & Technology (KUET), Khulna

Jan 2019 – April 2024

Result: CGPA-3.68 (Out of 4.00)

Higher Secondary School Certificate(HSC)

Shaheed Police Smrity College (SPSC), Dhaka

May 2016 – June 2018

Result: GPA-5.00 (Out of 5.00)

Secondary School Certificate(SSC)

Hazi Ali Hossain High School, Dhaka

Jan 2014 – Feb 2016

Result: GPA-5.00 (Out of 5.00)

SKILLS

Programming Languages: Python, JavaScript
Databases: Oracle, MySQL
Frameworks/Libraries: Flask, CSS, HTML, Bootstrap
Development Tools: VS Code, GitHub, PyCharm, Jupyter Notebook, Proteus, Micro Wind, Cisco Packet Tracer, Matlab
Data and AI Skills: Data Analytics, Generative AI, Machine Learning Specialization, Natural Language Processing (NLP), Search Engine Technology
Networking and Cloud: Computer Networking Operations, Network Design
Project Management: Jira, Trello: Jira, Trello
Office and Visualization Tools: PowerPoint, MS Word, LaTeX, MS Excel, Power BI, Tableau
Technical Skills: Basic Project Management, Verilog, Git

LICENSE & CERTIFICATIONS

Certificate 1

Career Essentials in Generative AI

- Earned the 'Career Essentials in Generative AI' certificate by Microsoft and LinkedIn, demonstrating proficiency in generative AI concepts and applications, enhancing my expertise in cutting-edge AI technologies. **[Link]**.

Certificate 2

Career Essentials in Data Analysis

- Completed a comprehensive program by Microsoft and LinkedIn, covering key data analysis concepts, tools, and visualization techniques to enhance decision-making and analytical skills. **[Link]**.

Certificate 3

SQL (Intermediate)

- Secured SQL Intermediate certification from HackerRank in August 2024, underscoring advanced capabilities in database architecture and sophisticated query optimization. **[Link]**.

PROJECTS

Project 1

myECGai: AI-Based ECG Monitoring Heart Disease Classification System

- Built deep learning models for heart disease classification using ECG signal data, improving diagnostic accuracy. Implemented signal processing algorithms to extract key cardiac features including BPM, QRS complex, QT interval, PR interval, and flatline detection.

Project 2

TV Channel Name Detection System (BSCL Project)

- Developed an AI-based system to automatically detect and classify TV channel logos from broadcast video streams.

Project 3

Chatbot System by Employing Llama2

- Developed a Llama2-based medical chatbot assisting practitioners with inquiries, enhancing interaction and precision using NLP. **[Github Link]**.

Project 4

Scratch-Built GPT-2 Model with Top-k and Temperature Sampling

- Built a GPT-2 transformer from scratch in PyTorch, trained on custom data, supporting top-k and temperature sampling for fluent generation without high-level libraries.

Project 5

LLM Fine-tuning and BERT-related NLP Projects

- Involved comprehensive NLP projects including sentiment analysis, text summarization, and fine-tuning of BERT, GPT, and DeBERTa, exploring advanced topics like long-document processing. **[Github Link]**.

Project 6

Face Recognition Attendance System Software Design

- A program that lets us employ a camera at an office, institution, etc. to record attendance. It is an application that is convenient to use and can lessen the issue of manual data entry. **[Github Link]**.

Project 7

Text Summarization System using Fast API

- Built a text summarization system with the Pegasus-CNN/DailyMail model, integrated with MLflow, Dagshub, Docker, and AWS for seamless NLP deployment. **[Github Link]**.

Project 8

Design of a Mobile Shop E-commerce Website

- Developed an e-commerce website using HTML, TailwindCSS, JavaScript, PHP, and Flask for a third-term Internet Programming Lab course project. **[Github Link]**.

EXPERIENCE

AI/ML Engineer

Teton Private Ltd

Tropical Molla Tower, 5th Floor, Bir Uttam Rafiqul Islam Ave, Dhaka 1212, Bangladesh

Nov 2024 – Present

THESIS

An Enhanced Hybrid IncepXt Ensemble Learning for Classification & Segmentation of Brain Tumor MRI Images Using Convolution Neural Network

- This is the final term thesis, and it's deep learning-based. To improve accuracy, I developed the ensemble model adopting a transfer learning technique. Subsequently, I compared it to previously presented models to confirm whether the model performed adequately or poorly compared to other models. **[Github Link]**.

PAPERS

- **An Averaging Ensemble Method for Multiclass Brain Tumor Classification Using Transfer Learning.** DOI: 10.1109/RAAICON64172.2024.10928685
